# **InterSystems Partners with Four Points Technology On \$31M Contract with Department of Veterans Affairs**

*Enterprise Software Agreement Provides CACHÉ Database Software, Support For VistA Electronic Health Record System*

CAMBRIDGE, Mass.--(BUSINESS WIRE)--InterSystems Corporation today announced that Four Points Technology, LLC will provide InterSystems' CACHÉ post-relational database to the Department of Veterans Affairs (VA) to fulfill a \$31.4 million contract. The contract is for enterprise software and maintenance services over a one-year period.

The leading database provider in healthcare, InterSystems develops and markets the CACHÉ post-relational database, Ensemble rapid integration software and HealthShare health information exchange platform. Four Points Technology, based in Herndon, Va., is a Service-Disabled Veteran Owned Small Business dedicated to providing IT products and services to the Federal government.

“InterSystems has a long and successful track record of providing technology to enable VA healthcare initiatives,” said Paul Grabscheid, InterSystems Vice President of Strategic Planning. “The VA wanted to utilize our CACHÉ database product and top-tier support in a manner that allows the VA to have direct access to InterSystems,” he continued. “To accomplish this, Four Points Technology was selected to act as the solutions partner for InterSystems technology through a competitive GSA contract process.”

“Our partnership with InterSystems makes it possible to provide the VA with the database software that is enabling the VA's VistA electronic health record (EHR) system,” said David Gilchrist, President of Four Points Technology. “We are very pleased to be working with the healthcare database technology leader in supporting the EHR application used for care delivery by VA healthcare providers worldwide.”

## **About InterSystems**

For over 25 years, InterSystems Corporation has been a technology innovation leader in database and integration software. The CACHÉ post-relational database, Ensemble rapid integration software and HealthShare health information exchange platform enable developers to quickly create, deploy and integrate high-performance systems. With world headquarters in Cambridge, Massachusetts, InterSystems has offices in 22 countries and provides support to customers in 88 countries.

InterSystems is a leader in integration technology and the world's #1 database provider in healthcare, with its products used by most major hospitals and labs, including America's 10 best hospitals as rated by U.S. News and World Report.
