Introduction

Contract Overview

The objectives of the Automatic Identification Technology VII (AIT-7) acquisition are to provide a state-of-the-art, common, integrated structure for logistics tracking, locating, and monitoring of assets and processes. Data collection, storage of information, information processing, and transmission of AIT data will greatly enhance systems within Department of Defense (DoD), United States Coast Guard (CG), North Atlantic Treaty Organization (NATO), Coalition Partners, other Foreign Military Sales (FMS), and other federal agencies. AIT technologies will provide standardization among Government users of AIT components purchased under this contract.

The contract shall provide for state-of-the-art, commercial items needed for automatic identification, data collection, keyless data entry, data processing, data storage, data retrieval, data transmission, and the tracking of assets, including the use of Radio Frequency (RF) technology for users throughout DoD, CG, NATO, Coalition Partners, other FMS, other federal agencies, and contractor purchasers in support of DoD.

Ordering Procedures

The mandatory ordering procedures to use the AIT-7 contract to obtain hardware, software, and services can be found in the Ordering Guide. Questions regarding these guidelines and procedures for placing orders against the contract should be directed to:

Ashley Atkins
Contracting Officer's Representative (COR), PL LIS
Office: 540-287-4842
Email: ashley.m.atkins2.civ@army.mil

Questions of a contractual nature should be directed to the Procuring Contracting Officer (PCO), Army Contracting Command – Rock Island (ACC-RI):

Benjamin Geringer
Contracting Officer
Office: (309) 782-1784
Email: benjamin.l.geringer.civ@mail.mil

John Kerch
Contract Specialist
Office: (309) 782-5830
Email: john.d.kerch.civ@mail.mil

Please contact the below Four Points POCs with all AIT-7 quote requests or to place an AIT-7 order:

Office: 571-353-7275
Email: jaller@4points.com

Forrest Wagner
Office: 703.657.6117
Email: fwagner@4points.com

The Government can reach out to the above Four Points POCs for additional information regarding Four Points' AIT-7 product offerings. You may also visit our AIT-7 website at the following site – see https://www.4points.com/contractvehicles/ait7/ .

Equipment

The equipment section shall be organized into sub-sections:

Major Types of Equipment Provided

Equipment Name	Physical Dimensions (WxLxH)	Power Requirements (Wattage/Voltage)	Heat Generated by Equipment
XX01 AA - Hand Held Barcode Terminal A (HHT-A) - Zebra ET60 Rugged Tablet	10.8" x 7.8" x 0.7"	45W / 15V	This device has protections built-in to prevent overheating
XX01 BA - Hand Held Barcode Terminal B (HHT-B) - DT Research DT382WH 8IN Rugged Tablet	5.8" x 9.2" x 1.1"	100 to 240V AC; Output: 19V DC, 3.42A	This device has protections built-in to prevent overheating
XX01 CA - Hand Held Barcode Terminal C (HHT-C) - Zebra ET60 Rugged Tablet	10.8" x 7.8" x 0.7"	45W / 15V	This device has protections built-in to prevent overheating
XX01 FA - Hand Held Terminal - HHT-F - DT Research DT362DN 6" Rugged Table	7.6" x 3.7" x 1.2" (192 x 95 x 31 mm)	65 W / 20 V	This device has protections built-in to prevent overheating
XX01 GA - Hand Held Barcode Terminal H (HHT-G) - DT Research C1D2 Certified DT362DH 6" Rugged Tablet	8.6" x 5.6" x 1.2"	100-240V AC; 12V	This device has protections built-in to prevent overheating

FOUR POINTS TECHNOLOGY

XX01 HA - Hand Held Barcode Terminal H (HHT-H) - Zebra TC5301 Mobile Handheld	6.48" x 3.04" x 0.66"	12 VDC. / Power Consumption. Up to 100 watts	This device has protections built-in to prevent overheating
XX01 HS - HHT-H SLED - Zebra RFD40 RFID Sled	5.94" x 3.3" x in. 6.5"	100-240 VAC / 12V	This device has protections built-in to prevent overheating
XX01 JA - Hand Held Barcode Terminal J (HHT-J) - Zebra ET60 10.1" Rugged Tablet	10.8" x 7.8" x 0.7"	45W / 15V	This device has protections built-in to prevent overheating
XX01 KA - Hand Held Barcode Terminal K (HHT-K) - Zebra MC9401 Rugged Handheld	9.4" x 3.5" x 7.4"	AC Input: 100-240V, 2.8A. DC Output: 12V, 9A, 108W	This device has protections built-in to prevent overheating

Each HHT is a hand-held device used to automatically capture and store data and can accept data through its color touch screen, stylus, full alphanumeric on-screen keypad (OSK), integrated barcode imager, or other attached devices. Each HHT can communicate with the portable/wearable barcode label printer.

Precautions

If two devices come within 1.8 to 3 meters of each other, the Zebra handheld devices sounds an alert. The two users then immediately should keep a distance from each other. If they ignore this warning, the tone repeats itself until there is enough distance between the two Zebra devices. Some of the Zebra devices also vibrate as part of the alert.

Equipment Interface Diagrams and/or Photos

The OC shall contain cable / equipment interface diagrams and /or photos for each CLIN that depict the typical operational configuration and provide instructions for users to specify equipment destination to ensure the AIT-7 equipment is compatible with the commercial power supply and adapter plugs for the geographic area in which it shall be operated.

FOUR POINTS TECHNOLOGY

Zebra ET60 Rugged Tablet:

FOUR POINTS TECHNOLOGY
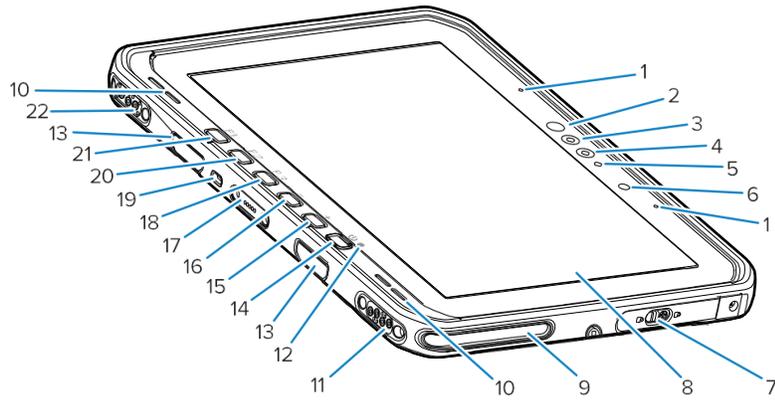

Number	Item	Description
1	Front microphones	Use for voice communications or audio recordings.
2	Windows Hello infrared LED	Illuminates your face with infrared (IR) light during Windows Hello face authentication.
3	Windows Hello infrared camera	Captures your face during Windows Hello face authentication.
4	Front camera	Use for video conferencing.
5	Front camera LED	Illuminates when the front camera is active.
6	Light sensor	Determines ambient light for controlling display backlight intensity.
7	Right access door	Secure door for accessing USB ports.
8	Touch screen	Displays all information needed to operate the device.
9	Dock alignment slot	Assists in aligning the tablet with the dock.
10	Speakers	Provides audio output.
11	Dock USB connector	Provides USB communication through the dock.
12	Charging indicator	Indicates power state and battery charging status while charging and application-generated notifications.
13	Keyboard/shoulder strap mount slots	Provides alignment and mounting of keyboard and shoulder strap clips.
14	Power button	Turns the display on and off. Press and release to turn on the device. Press and hold to restart the device. Provides finger print biometric authentication (optional).
15	**+** button	Programmable button (increase volume - default).
16	- button	Programmable button (decrease volume - default).
17	Keyboard interface connector	Provides power and communication with the keyboard.
18	**P3** button	Programmable button (keyboard shortcut Ctrl+Alt+Del - default).
19	Kensington security slot	Provides mounting a security cable to prevent theft or unauthorized use of the tablet.
20	**P2** button	Programmable button (opens **Copilot** application - default).
21	**P1** button	Programmable button (open **Zebra Control Hub** application - default).
22	Dock power / antenna connector	Provides power and antenna connection through the dock.

FOUR POINTS
TECHNOLOGY

Zebra TC5301 Mobile Handheld:
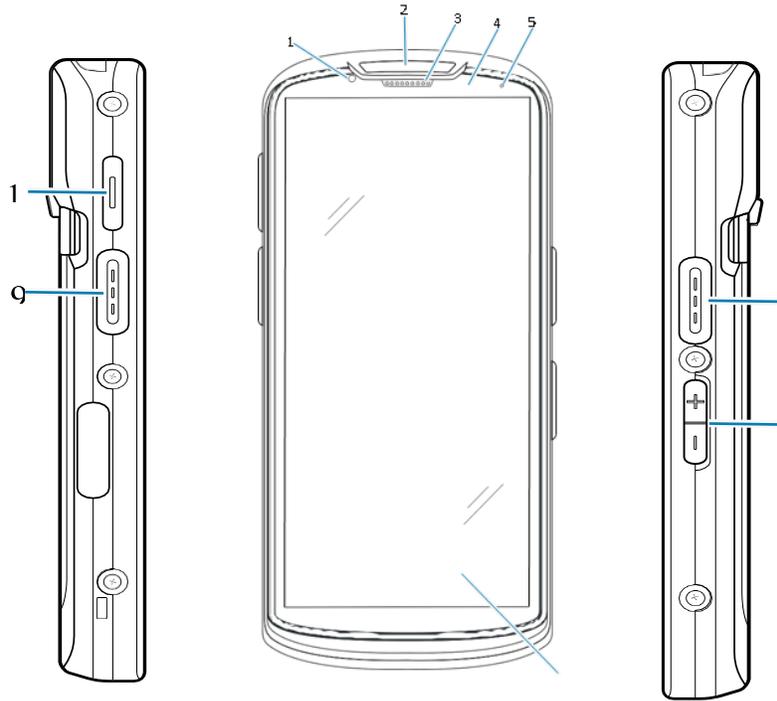

Number	Item	Description
1	Front camera 8MP	Takes photos and videos.
2	Scan LED	Indicates data capture status.
3	Receiver	Use for audio playback in Handset mode.
4	Proximity/light sensor	Determines proximity and ambient light for controlling display backlight intensity.
5	Battery status LED	Indicates battery charging status while charging and application generated notifications.
6, 9	Scan button	Initiates data capture (programmable).
7	Volume up/down button	Increase and decrease audio volume (programmable).
8	6 in. LCD touch screen	Displays all information needed to operate the device.
10	PTT button	Typically used for PTT communications. Where regulatory restrictions exist[1], button is configurable for use with other applications.

FOUR POINTS TECHNOLOGY

Zebra MC9401 Rugged Handheld:
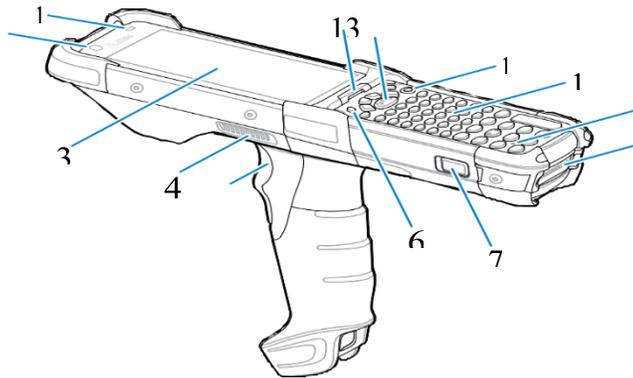

Number	Item	Description
1	Ambient light sensor	Controls display and keyboard backlight.
2	8 MP front-facing camera	Use to take photos and videos.
3	Display	Displays all information needed to operate the device.
4	Speaker side port	Provides audio output for video and music playback.
5	Trigger	Initiates data capture when a scan application is enabled.
6	P1 - dedicated PTT key	Initiates push-to-talk communications (programmable).
7	Battery release latch	Releases the battery from the device. To release the battery, simultaneously press the battery release latches on both sides of the device.
8	Battery	Provides power for operating the device.
9	Microphone	Use for communications in Handset mode.
10	Keypad	Use to enter data and navigate on-screen functions.
11	Power button	Press and hold to turn on the device. Press to turn on or off the screen. Press and hold to select one of these options: • **Power off** - Turn off the device. • **Restart** - Restart the device when the software stops responding.
12	Center scan button	Initiates data capture when a scan application is enabled.
13	Charging/notification LED	Indicates the battery charging status while charging, app-generated notifications, and data capture status.

Zebra MC9401 Rugged Handheld:
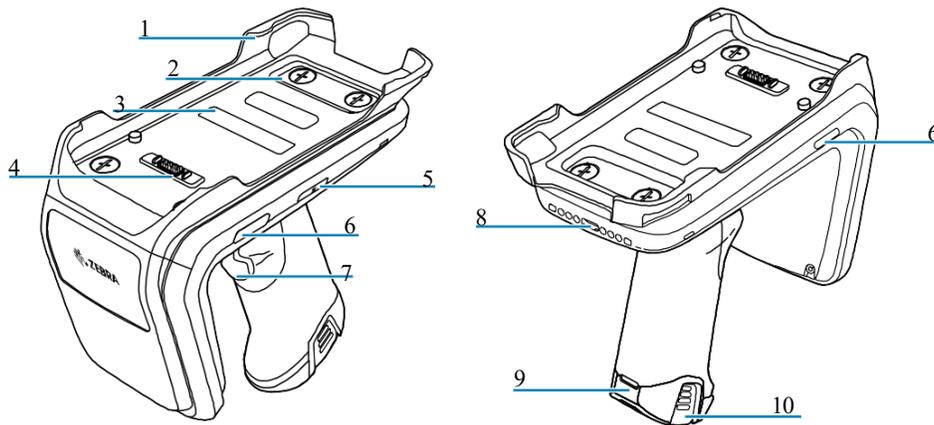

1	Adaptor (Sold Separately)
2	Coin Screws (4)
3	Adaptor Label
4	eConnex^{TM} Communication Port
5	Battery Status LED
6	Decode LED
7	Tri-Function Trigger
8	Charging Contact and USB-C Port
9	Tethering Point for Handstrap
10	Rubber Foot

Software

ZebraDesigner 3 Software

ZebraDesigner 3 barcode label design software makes creating industry standard and compliant labels based on fixed or variable data simple.

ZebraDesigner Professional offers a more robust toolset to create complex label designs, including RFID support, database connectivity, simple VB scripting and data manipulation and concatenation. It requires purchase of a one-time activation license key.

ZebraDesigner Feature Matrix	ZebraDesigner Professional*

FOUR POINTS
TECHNOLOGY

Software/Drivers:

Microsoft .NET Framework v. 4.7.2
ZDesigner Windows printer driver v. 10.6.x.x or above is recommended.
If support for CPCL or EPL printer command languages is required, ZDesigner Windows printer driver v. 5.x can be used

Virtualization
Remote Desktop Services:

With the exception of Hyper-V technologies, Remote Desktop Services and Virtual Machines are not supported.

Compatibility

ZebraDesigner 2 label files

ZebraDesigner 2 Pro label files

Can be opened/edited in ZebraDesigner Essentials 3

Can be opened/edited in ZebraDesigner Professional 3

Training

Four Points shall provide training associated with Technical Engineering Services (TES) that is customized to each task order solution being delivered. The training can be conducted in a group or one-on-one setting and will be based on the task order's work statement.

Warranty Support

Four Points shall provide a minimum three-year warranty (including the initial and separately orderable HHT batteries, but excluding cables and ancillary items, such as power supplies, docking stations, battery charger, etc.) and an optional two-year warranty (excluding batteries and ancillary items) where specified in this PWS, including all parts, labor, and transportation costs for all AIT-7 components provided under this contract. All products delivered under this contract shall have a permanent label affixed to each serialized item (excluding batteries and cables) that, at a minimum, identifies: the contractor's company name, telephone number and website URL. Four Points shall provide a minimum of a three-year warranty for all software products. The three-year warranty will be included in the purchase price of the component and not priced separately.

Preventative Maintenance

GUIDANCE FOR HHT's:

Follow these preventive maintenance steps to ensure optimal performance and longevity:

FOUR POINTS TECHNOLOGY

Cleaning and Disinfecting

- **Use Approved Disinfectants**: Ensure the use of recommended chemical disinfectants such as SANI-CLOTH, Cavi Wipes, or 70% Isopropyl Alcohol.
- **Avoid Film Residue**: Test a small portion of your tablet before cleaning to prevent any film residue. Clean using a damp cloth followed by a dry cloth to remove any cleaning agent residue.

Accessories and Parts Maintenance

- **Battery Care**: Consider battery services such as Proactive Battery Replacement and Battery Maintenance to ensure batteries are in good condition. Replace batteries that cannot maintain an 80% charge.
- **Software Updates**: Keep the software and Android security updates current using LifeGuard™ for Android to protect against security risks and ensure smooth operations.

Cleaning Solutions

- Recommended solutions include Goo Gone, Tuffie Wipes, and Alcohol Prep Pads for thorough cleaning without damaging the tablet surface.

Additional Tips

- Use Zebra's maintenance kits or equivalent tools for proper cleaning.
- Schedule regular checkups to spot and correct potential issues before they escalate.

Summary

Follow these cleaning protocols and consider enrolling in Zebra OneCare™ Maintenance Plans for more comprehensive coverage and support, ensuring your devices remain reliable and in peak condition.

GUIDANCE FOR PRINTERS:

Key Components and Methods

- **Printhead**: Clean frequently with a solvent, especially after every roll of media.
- **Platen Roller**: Use solvent cleaning for optimal performance.
- **Media and Ribbon Sensors**: Blow air to remove particles.
- **Media and Ribbon Paths**: Clean with solvent to prevent buildup.

Maintenance Schedule

The intervals for cleaning can vary based on usage, but here are some general guidelines:

- **Direct Thermal Mode**: Clean printhead after each roll of media or 500 feet of fanfold media.
- **Thermal Transfer Mode**: Clean platen roller after every roll of ribbon.

Tools

- **Preventive Maintenance Kit**: It's recommended to use Zebra's maintenance kit for cleaning. Alternatively, a lint-free cloth dipped in 99.7% isopropyl alcohol can be used.

These maintenance practices help prevent damage and ensure that the print quality remains high. Always refer to the specific product's user guide for detailed instructions.
