

How am I billed for my AWS account through Four Points?

Your institution will issue a funded Purchase Order (PO) to Four Points. Four Points will invoice your institution for the Cloud Services actually consumed on a monthly basis in arrears (i.e. January's consumption is billed in February). Depending on your institution's policies and needs, Four Points will tailor our monthly invoicing and reporting to support either a single invoice to your institution as a whole (with backup reporting at the level of detail required to support billback/show back) or multiple individual invoices for each funded project.
