

How do I get started with the NET+ program?

Signing up for the NET+ AWS program requires two agreements. The first is executed with Internet2, the second with the reseller.

Start the process by emailing netplus@internet2.edu asking for information about NET+ AWS. Internet2 will send you review copies of both agreements.

When you are ready, you can send Internet2-specific questions to netplus@internet2.edu and NET+ AWS program manager, Bob Flynn can assist with program information, help you identify resources, and connect you with peer mentors and others in the community who have relevant experience for what you are trying to achieve.

For your questions about the agreement with Four Points and inquiries about the onboarding process, email I2_AWS_FPT@4points.com.
