

REDUCE ORACLE COSTS AND GAIN FINANCIAL CLARITY WITH A FULLY FUNDED OPTIMIZATION & LICENSING ASSESSMENT (OLA)

Legacy Oracle and VMware environments are consuming significant portions of public sector IT budgets. Hidden licensing costs, unpredictable renewals, and complex procurement cycles make financial planning difficult and slow modernization efforts.

TrekFed's AWS-funded Optimization & Licensing Assessment (OLA), powered by Remapped, delivers the data and clarity finance teams need to control spend, reduce risk, and build validated modernization plans, all with zero cost, zero risk, and zero downtime.

WHAT IS AN OLA?

The OLA is a fully funded assessment delivered by TrekFed that uses Remapped's intelligent discovery platform to analyze your Oracle and VMware environments. It automatically collects usage and licensing data, models multiple cloud scenarios using real AWS pricing, and produces a financial and operational roadmap to modernization.

The outcome: a clear, finance-ready business case for transformation that shows exactly where savings can be made and how to reinvest those savings in innovation.

KEY CAPABILITIES

Comprehensive Cost Analysis

Uncover total Oracle and VMware spend, including unused, redundant, or high-cost licenses.

License Optimization

Identify compliance gaps and opportunities to consolidate licensing or apply bring-your-own-license (BYOL) strategies.

5-Year TCO Forecasting

Model cost and performance trade-offs across EC2, RDS, and Aurora PostgreSQL using live AWS pricing.

Procurement Alignment

Simplify and accelerate procurement processes with AWS-backed, audit-ready reporting.

Audit & Compliance Risk Reduction

Proactively detect and correct noncompliance issues before they become costly.

WHY FINANCE LEADERS USE THE OLA

Public sector finance leaders face competing pressures: reduce costs, maintain compliance, and support modernization. The OLA provides clear financial visibility to meet all three objectives.

Budget Efficiency

Recover 20-40% of wasted spend across Oracle and VMware environments.

Predictable Cost Planning

Receive accurate, data-backed TCO forecasts that support long-term financial planning.

Procurement Simplification

Accelerate modernization with AWS-funded engagement that requires no procurement cycle.

Audit Readiness

Protect your organization from unplanned expenses or penalties by validating license positions early.

Financial Alignment

Bridge finance, IT, and procurement teams with shared data, a common view of risk, and a validated cost-saving roadmap.

OLA BENEFITS AT A GLANCE

20-40% Savings on Licensing & Infrastructure:

Reclaim unused spend and optimize entitlements.

5-Year TCO Forecast:

Budget with accuracy using live AWS pricing models.

Reduced Audit Risk:

Identify and eliminate noncompliance exposure.

Faster Funding Approval:

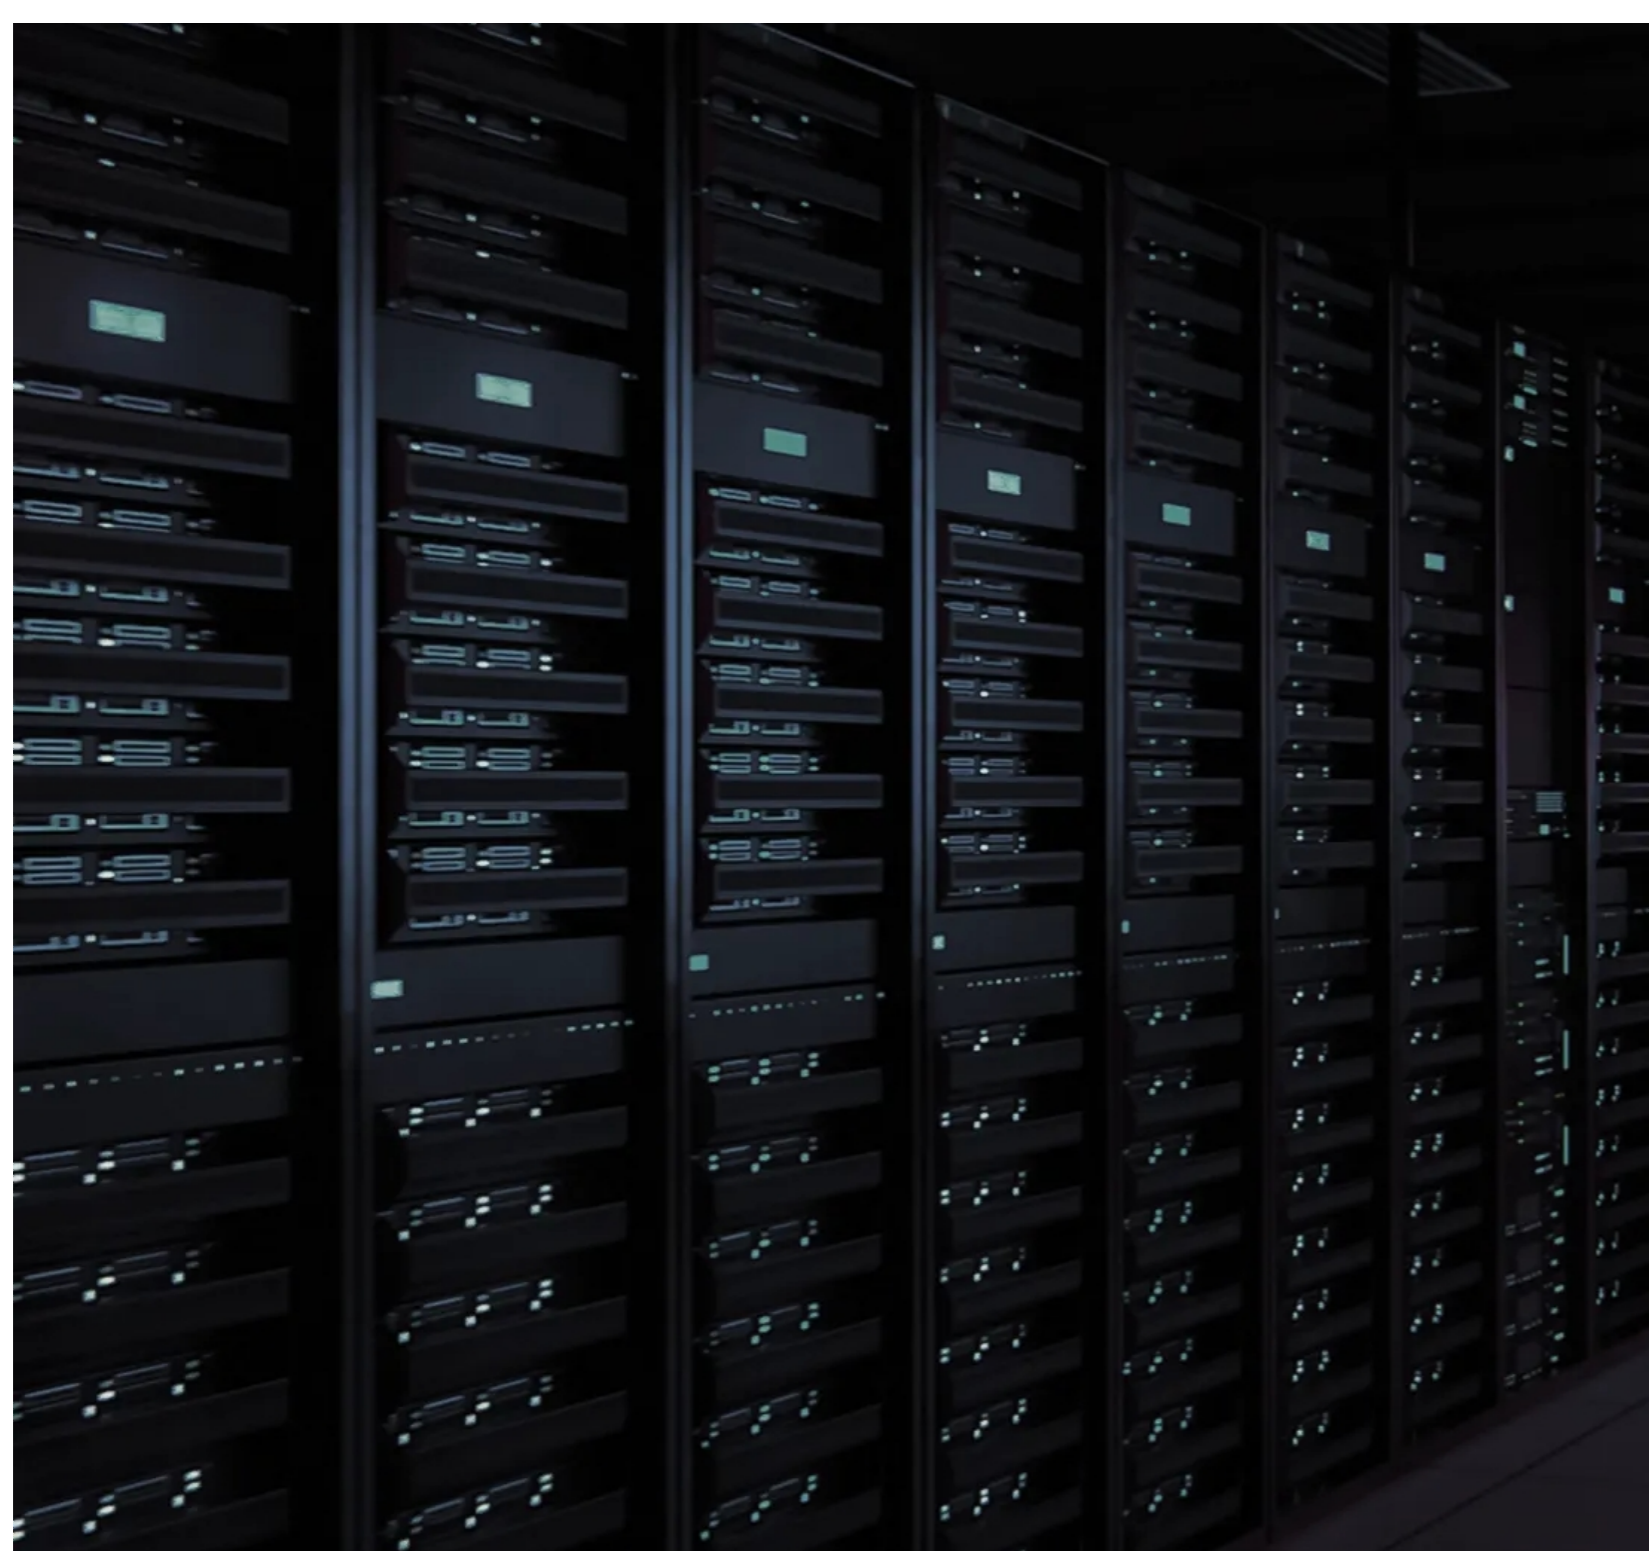

Leverage AWS support to unlock MAP migration funding.

Zero Upfront Cost:

Fully funded by AWS with no procurement delay.

Actionable Financial Insights:

Align finance and technology decisions with confidence.

PROVEN. COMPLIANT. PUBLIC SECTOR READY.

TrekFed is an AWS Premier Tier Partner with Government Competency, trusted by public sector agencies to deliver secure, efficient modernization initiatives.

- AWS Premier Tier Partner with Government Competency
- Compliant with FedRAMP, NIST 800-53, HIPAA, PCI DSS, SOC 2, and ISO 27001
- Proven experience supporting U.S. government, education, and defense sectors
- Deep expertise in AWS-native optimization, cost management, and observability

WITH TREKFED AND REMAPPED, YOUR AGENCY GAINS FINANCIAL CONTROL, COMPLIANCE CONFIDENCE, AND A ROADMAP TO MODERNIZATION, DELIVERED SECURELY AND FULLY FUNDED.
