

**What AWS services will I have access to under the Internet2 NET+/Four Points agreement?**

You will have access to all native AWS-Services including but not limited to storage (S3), compute (EC2), and other services as described by AWS at the following URL: <https://aws.amazon.com/products>. In addition to AWS-native services, you'll have access to AWS-delivered support, ProServe, training, and managed services as well as third party services and solutions (via the AWS Marketplace)
